

INSTRUCTIONS

SIZE

This document represents the entire lid of the box.

TEXT

When adding text to your design, please **duplicate the text layer and create outlines**. Right click the text and click Create Outlines.

ARTWORK FOR LASER ENGRAVING:

If your artwork is to be used for laser engraving, please ensure your artwork is in **grayscale**. No colours please. If there are different shades of grey within the artwork, a lighter shade of grey will give a lighter/shallower engrave and darker areas will have a darker/deeper engrave.

ARTWORK FOR FOILING

Any part of your artwork that is a solid colour will be foiled. It is best to stick to a single solid colour if possible so you can clearly see the design to be foiled. Ensure that it does **NOT include any shadows or gradients**.

SAVING YOUR FILE

Save your file as a .AI or .EPS file. Please ensure you have 'Embed Fonts' and 'Include Linked Files' checked under Options when saving the file. You can then upload the AI or EPS file to 3XM via TED.
